TAX FREE IN RETIREMENT

Many Americans assume that their taxes in retirement will stay the same or go down. Unfortunately, for most, this may not be the case. Historically, federal tax rates have been as high as 91% in the 50's and 50% in the 80's. Upon retirement, social security may be taxable as high as 85% to the recipient, and required minimum distributions from retirement accounts can also create substantial taxable income. This course will address the current tax law, where they may go in the future and how higher taxes can change your retirement. You will also learn the concepts on how to eliminate taxes on social security. Join us to learn about strategies that can help you get closer to a tax free retirement.
